

## EVE TIGWELL – Eve Tigwell Consultancy

Eve gained her BSc (Hons) in Applied Biology at the University of Bath, before going on to research at the University of Hull.

After working for a range of national and international companies, Eve set up her retail consultancy business over 21 years ago.

The services she offers include retail design, business and people management, and training. The majority of clients are garden centres and nurseries, and work has taken her around the UK and to many other countries in both hemispheres.

Eve's latest projects involve re-design, retail and business improvements for centres in the UK, Germany, Canada and Denmark, whilst introducing standards monitoring to those national associations outside the UK. In 2010 she will be addressing the Danish and Hungarian Garden Centre annual conferences.
